DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hegland et al (Hegland).

Hegland discloses both a method and apparatus for performing a multi-dimensional Fourier transform wherein the multi-dimensional data is divided into a plurality of two-dimensional data elements and then stored in corresponding caches of a plurality of processors, note the abstract and Fig. 2. Relative to claims 1, 2, 4 and 5 note that the multi-dimensional data may be two-dimensional. Relative to claim 3 note Figs. 17-23 and col. 3 line 22 thru col. 4, line 5.

Claim Rejections - 35 USC § 112

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 paragraph (c) is inconsistent with paragraph (b) because paragraph (b) calls for performing of all the processing that is necessary to perform the two-dimensional Fourier

transform. In paragraph (c) the phrase "a required number of times" lacks meaning and the phrase "the remaining one-dimensional data elements" lacks clear antecedent basis. Claims 4 and 5 contain deficiencies similar to claim 1. In claim 2 the "plurality of vectors" fail to be clearly related to the previously recited data elements.
